

```
stay(human).sec:~$ cat alert.md
```

AI WATCH

"Mom, I need money right now."

It sounds exactly like your kid.
It might not be.

here's how it works ->

 stay(human).sec

1/4

```
stay(human).sec:~$ cat alert.md
```

WHY IT MATTERS

3 seconds of audio is all it takes.

A public video, a voicemail greeting, a livestream clip — that's enough for an AI tool to clone a voice convincingly enough to fool a parent on a panicked phone call.

here are the tells ->

```
stay(human).sec
```

```
stay(human).sec:~$ cat alert.md
```

— □ ✕

THE TELLS

What gives it away:

URGENCY

No time to think, verify, or call anyone else first.

PAYMENT

Wire transfer, gift cards, or crypto — never traceable.

SECRECY

"Don't tell anyone else" — so nobody can check the story.

the fix -> 

() stay(human).sec

3/4

```
stay(human).sec:~$ cat alert.md
```

FILE_005.md

**Hang up.
Call them back.**

One habit that **beats it every time.**

Like. Comment. Follow.
(yes, all three – we're needy)

Next: turn on 2FA –
what it actually protects.
