

```
stay(human).sec:~$ cat alert.md
```

AI WATCH

"Mom, I need money right now."

It sounds exactly like your kid.
It might not be.

here's how it works -> 

 stay(human).sec

1/4

WHY IT MATTERS

3 seconds of audio is all it takes.

A public video, a voicemail greeting,
a livestream clip — that's enough for
an AI tool to clone a voice
convincingly enough to fool a parent
on a panicked phone call.

```
$ audio_needed: 3 seconds
```

here are the tells -> 

THE TELLS

What gives it away:

URGENCY

No time to think, verify, or call anyone else first.

PAYMENT

Wire transfer, gift cards, or crypto — never traceable.

SECRECY

"Don't tell anyone else" — so nobody can check the story.

the fix -> 

```
stay(human).sec:~$ cat alert.md
```

FILE_005.md

Hang up. Call them back.

One habit that **beats it every time.**

Like. Comment. Follow.
(yes, all three – we're needy)

Next: turn on 2FA –
what it actually protects.
